

Genuine Spicer® R155/156 Produced Before February 2016 - Pinion Shim Discontinuation

Date: **Monday, August 26, 2019**

To: **All Dana Aftermarket Group Spicer® Heavy Axle Customers**

Affected Models: **R155/R156 Models produced before February 15, 2016**

The R155 and R156 drive axle models produced before February 15, 2016 went through a pinion bearing design change to improve efficiency. This change in design impacted the stack up of the pinion bearings and shims. The shim thickness was increased, making the two generations incompatible. The pinion bearing shims related to this "early model" will no longer be available in service.

When servicing "early model" carriers you must make sure the pinion bearings, spacers, and shims are from the same generation, new with new, old with old. Please also reference HAXL-PNI-110 on the spacer discontinuation.

The shims in Table 1 on the right will be discontinued when stock is exhausted. The new shims, pinion bearing cups, and cones are in Table 2.

If you need additional information, please contact your Dana Aftermarket representative. Thank you for your continued support of Dana Aftermarket products!
